## [Ultrasonic Cavitation, RF, Diode Laser Beauty Machine \(Body Shaping Machine, Lipocyte Reduction Machine\)](#)

### **Ultrasonic Cavitation, RF, Diode Laser Beauty Machine (Body Shaping Machine, Lipocyte Reduction Machine)**

We are a China-based professional ultrasonic cavitation, RF, diode laser beauty machine manufacturer and supplier. We specialize in designing and producing IPL skin rejuvenation equipment, RF skin lifting equipment and E-light beauty equipment, etc. What you see here is one of our core products, ultrasonic cavitation, RF, diode laser beauty equipment, also called body shaping machine, lipocyte reduction machine because of its body slimming function.

#### **Advantages**

This ultrasonic cavitation, RF, diode laser beauty machine is a new equipment which uses the most advanced technology. It highly combines the advantages of ultrasonic cavitation and RF technologies. The ultrasonic cavitation system takes advantage of ultrasound cavitation effect to induce the air bubbles around lipocyte membranes to break up. The broken lipocyte will then be absorbed and metabolized out of human body through lymphatic system. Meanwhile, the beauty machine generates 10 MHz radio frequency to alternate the electric field in the skin from positive to negative, and the RF will generate heat energy under dermis. The adjuvant therapy of 635nm diode laser greatly promotes the RF treatment effect. Subsequent neocollagenesis then further tightens the dermal tissue and makes the skin tightening, smooth and fresh.

#### **Applications**

Ultrasonic cavitation, RF, diode laser beauty machine is ideal alternative to traditional single-functional body shaping machines, and lipocyte reduction machines. It can be used for body shaping, skin tightening, skin rejuvenation and can soften hard fat tissue and break up lipocyte.

#### **Technical parameters of ultrasonic cavitation, RF, diode laser beauty machine**

Model	Classic-A□B, C, D, E, F
Display	5.7 inch color touch screen
Diode Laser Wavelength	635 nm
Cavitation Max Output	100W
Cavitation Frequency	40KHz / 28KHz+40KHz
RF Frequency	1-40MHz, adjustable
RF Energy	2-300J, adjustable
Power Supply	110/220V□10□ 60HZ 6A
RF Output Mode	Tripolar
Dimension	38×30×35cm
Weight	20kg

Now, we have sales agent widely distributed in more than 30 countries and regions. We at NOBLE provide OEM and ODM services. We can manufacture beauty equipment as you require and can put your logo on the outer case or display screen if needed. The color of our beauty machine is also customizable.

If you are in need of ultrasonic cavitation, RF, diode laser beauty machine or other related beauty equipment, please contact us. We are happy to serve you!
