
[Laser Tattoo Removal Machine \(Pigment Removal Equipment\)](#)

Laser Tattoo Removal Machine (Pigment Removal Equipment)

We are a specialized laser tattoo removal machine manufacturer, located in China. In addition, we also provide IPL skin rejuvenation equipment, E-light beauty equipment and oxygen jet skin care equipment, etc. Here is the introduction of our four types of laser pigment removal equipment. These four models beauty machine have the same technical parameters but with different outer cases for our customers to choose. They are extensively used in professional beauty hospitals, clinics, laser beauty institutions, spas and beauty salons.

Working principles

The laser tattoo removal machine is designed for the treatment of lesion tissue in epidermis and dermis. By generating laser light at wavelength of 1064nm or 532nm, the pigment removal equipment can induce the pigment particles to expand instantly and finally to be expelled from human body.

Applications and Features

Laser tattoo removal machine is often used to remove tattoo and color spots. This machine can bring you an instant effect without scars, scabs, marks or damages and has no harm to the normal tissues. It has already won high customer satisfaction.

Why choose Noble laser tattoo removal equipment?

1. Our laser tattoo removal machine is equipped with radiators that are often installed in BMW and Audi automobiles. This ensures the equipment can work 24 hours continuously.
2. This pigment removal equipment has four languages for you to choose, and it comes with environmental power supply conforming to CE standard.
3. With independent laser cavity, this laser tattoo removal equipment has fewer faults and has no polarized light and edge light.
4. The voltage of this equipment can reach up to 1000V, and its energy is 20% higher than any other laser tattoo removal machine.

Technical Parameters of Speed-5, Speed-6, Speed-8, Speed-9

Laser Type	Q-Switched Nd: YAG laser
Wavelength	1064nm/532nm
Pulse Energy	500mj
Duration (width)	10ns
Pulse Repetition Rate	1-6Hz
Weight	20kg
Voltage	220V±10% 50 Hz 6A, 110V±10% 60 Hz 12A
Cooling Method	Closed-loop de-ionized distilled water cycle

As a China professional manufacturer of laser tattoo removal machine, we constantly introduce international advanced technology and production equipment to improve the performance of our beauty equipment. Now, our products are successfully export to more than 30 countries such as Canada, America, Argentina, Britain, Italy, Spain and Thailand. The color, voltage and power line can be customized, and client's logo can also be put on the outer case or display screen as required. We also provide OEM, ODD services.
